Quick help

From: <http://www.w3.org/TR/CSS2/box.html>

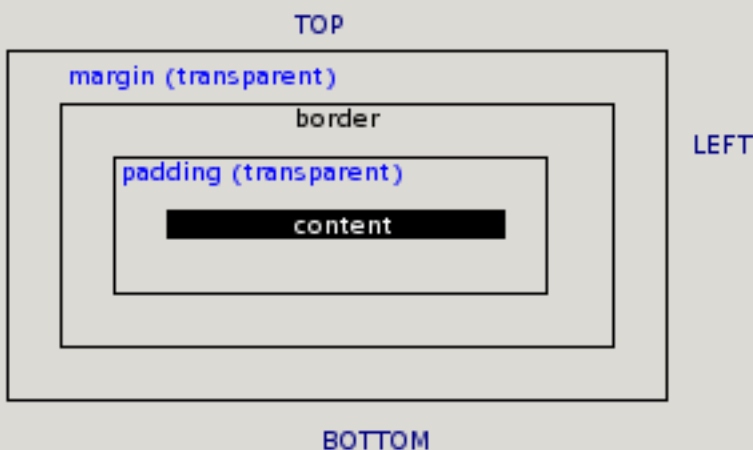

Each box has a content area (e.g., text, an image, etc.) and optional surrounding padding, border, and margin areas; the size of each area is specified by properties defined below. The following diagram shows how these areas relate and the terminology used to refer to pieces of margin, border, and padding.

The perimeter of each of the four areas (content, padding, border, and margin) is called an "edge", so each box has four edges:

- content edge or inner edge:

The content edge surrounds the element's rendered content.

- padding edge:
